

OXIDOS FERRICOS S.A.

Sales & Distribution by Lawrence Industries Ltd in the UK & Ireland | +44 (0) 1827 31 41 51 | www.l-i.co.uk

ABOUT US

OXIDOS FERRICOS S.A. is a family business company with more than 50 years of experience in its field.

Our company is situated in Guadix (SPAIN) and it is the first spanish company producer of micaceous iron oxide.

Our mining plant is dated from the XVIII Century, and it is one of the oldest mining plants in Spain.

OXIDOS FERRICOS S.A. extract, transform develop and supply micaceous iron oxide for industry.

M.I.O (MICACEOUS IRON OXIDE)

Micaceous Iron Oxide is a naturally occurring mineral substance used as the primary ingredient in protective coatings and primer due to its anticorrosive properties.

M.I.O is water resistant and aligns to metallic surfaces to which it is applied. It forms a protective barrier of overlapping plates and effectively prevents corrosion infiltration.

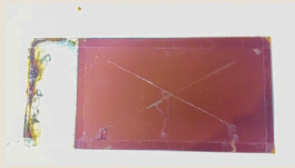

The flakes form by micaceous iron oxide are weather resistant and UV- absorbent

FERROXID[®]

Our product Ferroxid[®] is a high quality product with many applications.

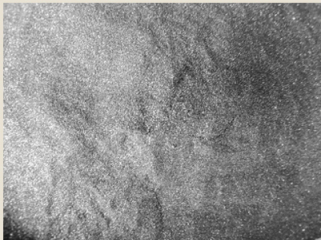

To ensure the high quality of Ferroxid[®] products, we are committed to the highest standards in all our processes in terms of innovation, technical support, quality product, security of supply, safety, ethical behavior and environmental protection.

This is an example of a saline test.

Paint without FERROXID[®] – Paint with FERROXID[®]

We offer 5 types of Ferroxid[®] with different particle sizes, from Ferroxid[®]63, (the thinnest particle size), to Ferroxid[®]200 (the thickest particle size), with 3 more types in between, Ferroxid[®]70, Ferroxid[®]88 and Ferroxid[®]120.

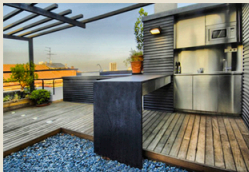

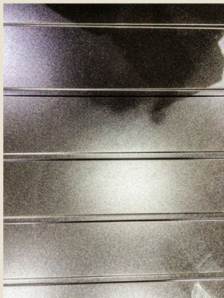

APPLICATIONS

- Coatings and Paints
- Welding Rods
- Decoration
- Ceramics
- Cement
